### About Navitas:

Founded in 2014, Navitas Semiconductor Limited is the industry leader in ultra-efficient [gallium nitride](#) (GaN) semiconductors that are revolutionizing the world of power electronics in terms of efficiency, performance, size, cost and sustainability.

GaN is a next-generation semiconductor technology that is growing in importance because of its ability to offer significantly improved performance over conventional silicon semiconductors while reducing the energy and physical space needed to deliver that performance. GaN technology will accelerate the transition to a sustainable future by delivering efficiency improvements, lowering the cost of clean energy and reducing the materials and energy needed to create power semiconductors. Compared to legacy silicon, GaN runs up to 20 times faster, enables up to three times more power and delivers three times faster charging while halving application size and weight.

Navitas is the only GaN company to monolithically integrate GaN power with drive, control and protection into a single-chip integrated circuit (IC). Navitas GaNFast ICs are easy-to-use 'digital in, power out' building blocks that enable up to one hundred times faster switching speeds while increasing energy savings by as much as 40%. These devices enable faster charging, higher power density and greater energy savings for mobile, consumer, enterprise, eMobility and new energy markets.

Navitas has a strong and growing team of power semiconductor industry experts with a combined 300 years of experience in materials, devices, applications, systems and marketing, plus a proven record of innovation with over 200 patents among its founders. Over 130 Navitas patents are issued or pending, and over 25 million GaNFast power ICs have been shipped with zero reported GaN field failures.

On May 7th, 2021, Navitas announced plans to "Go Public at an Enterprise Value of \$1.04 Billion via Live Oak II (NYSE: LOKB) SPAC Business Combination.

## **The Navitas Semiconductor Management Team**

Navitas is run by a management team with an extraordinary track record of innovation and business creation in power electronics:

Gene Sheridan:	Co-Founder & CEO
Dan Kinzer:	Co-Founder & CTO/COO
Nick Fichtenbaum:	Co-Founder & VP, Engineering
Jason Zhang:	Co-Founder & VP, Applications & Technical Marketing
Todd Glickman:	Senior VP, Finance
David Carroll:	Senior VP, Worldwide Sales
Paul Delva:	Senior VP & General Counsel
Stephen Oliver:	VP, Corporate Marketing & Investor Relations
Marco Giandalia:	VP, IC Design Engineering
Anthony Schiro:	VP, Quality
Charles Zha:	VP & GM, Navitas China
Lip-Bu Tan:	Advisor
